Adaptability

PROFILE

I started my journey as a full-stack .NET developer, crafting web applications and software solutions.

My passion for data led me to transition into data analytics, where I uncovered insights and built stories from numbers.

Eager to deepen my skills, I ventured into data science, blending statistical models with real-world impact.

Today, I stand as a data engineer — designing scalable pipelines, building data systems, and enabling data-driven decisions.

With a strong foundation in Python, SQL, and cloud-native tools, I bridge the gap between raw data and actionable intelligence.

Beyond the code, I'm an eSports enthusiast, driven by a competitive spirit and a love for continuous learning.

PROGRAMMING SKILLS

Python

Good Knowledge of python

Big Data

Having a knowledge of Kafka, spark using python ,

Dotnet

Good Knowledge of C# | Asp .net | MVC | WEB FORMS

SQL

Good Knowledge of MySql and MsSql

HOBBIES

Playing Games,
Gymming,
Swimming
